

Help us keep you safe

Auckland Emergency Management (AEM) is a part of Auckland Council and works in partnership with emergency services and other organisations to ensure effective coordination of civil defence and emergency management within the Auckland region.

We have been asked to assist with getting the word out on behalf of Auckland Emergency Management who are undertaking research to understand how prepared Auckland businesses are in an emergency that would cause major disruption. Examples include a flood, major fire, tsunami or prolonged loss of power? How well would your business association area and your members cope?

Below you will find two links – the first is to a survey that AEM are asking all BIDs and Business Associations to respond to and the second link which they are seeking your support to share with your members to get as wide a cross section of responses from Auckland businesses as possible.

The results from individual BIDs / Business associations and business members will remain confidential but the final report and general findings will be shared with you all early next year.

Thank you for helping with this important work.
